

## THE ADVANTAGES OF BIONOME SPA

Well-being and relaxation at the institute in conjunction with daily beauty care at home.

Treatments at the cosmetic institute and/or a wellness spa with bionome SPA products from DR. BAUMANN COSMETIC revitalize body and soul. Your skin is also visibly fresher and more youthful-looking. Revitalization at it's best.

This wonderful source of well-being and beauty should also be continued at home by nourishing and pampering yourself daily with DR. BAUMANN COSMETIC bionome beauty care products.

Even the best professional treatment lasting a few hours cannot possibly replace a good home skincare routine over weeks, months and years and cannot repair damage done through skincare mistakes. Therefore you should have professional treatments in conjunction with a healthy bionome skincare routine at home. That way you will achieve well-being and optimal results for your skin.

The 8 BIONOME Quality Criteria For Skin Friendly, Animal-Friendly And Environmentally Friendly Products:

- Free of chemical preservatives
- Free of chemical colorants
- Free of chemical sunscreens
- Free of oxygen
- Free of fragrances
- Free of animal derivatives
- Free of mineral oils
- Free of paper packaging

Only Skin Compatible Or Skin Identical Ingredients Are Used.

A fountain of youth for skin, body and soul

"Well planned vegan and other forms of vegetarian diets are appropriate for all phases of the life-cycle, including pregnancy, lactation, early and later childhood and adolescence. Vegetarian diets offer a range of benefits."

Historically the word 'spa' is derived from the Latin "sana per aquam" meaning health through water. Since then the term also pertains to the use of oils, essentials oils, mudpacks, sea salt, algae etc., everything which enhances health and well-being. Today SPA is also a synonym used for heath farms, day spas and cosmetic institutes. Wellness treatments are carried out in cosmetic institutes with special SPA products. Beauty care at home should be tied in with these treatments in order to achieve lasting success.

According to the Duden German dictionary "bionomy" is the "science of the laws of life". These laws are the qualitative basis for the development of all DR. BAUMANN COSMETIC products, as well as the bionome SPA line. Besides well-being and relaxation the bionome SPA products also ensure optimal and healthy skin care. Therefore all ingredients are selected based on strict dermatological and allergological criteria and thought has been given to our environment.

## IMPORTANCE OF NUTRITION FOR HEALTH, BEAUTY AND WELL-BEING

A healthy diet is of utmost importance for a beautiful skin and for the health and well-being of the body and soul. A large number of human illnesses, especially cancer and cardiovascular disease, can be avoided through preventative measures such as a healthy diet, having adequate exercise and not smoking. The importance of a healthy diet for a beautiful skin cannot be stressed enough. Many scientific studies have shown that a vegetarian diet is healthier. This is stated in a 2003 policy document published by the ADA (American Dietetic Association) and the DC (Dieticians of Canada) on the health benefits of vegetarian and vegan diets.

Many of the most renowned dieticians in the USA and Canada are members of these associations. The ADA alone has around 70 000 members. In this official policy document it states: All SkinIdent® facial care creams can be applied to skin without the prior application of a liposome product. However, it is highly recommended that one first apply a SkinIdent® liposome product because the multilamellar liposomes and other valuable ingredients are fantastically effective. Liposomes do not only greatly improve the skin's moisture content but also aid the penetration of other skin-friendly substances. You will be elated when you see how your skin benefits.

"It is the position of the American Dietetic Association (ADA) and the Dieticians of Canada (DC) that a sensible, well-planned vegetarian diet is conducive to good health and suitable for meeting nutritional needs, as well as being a healthy way of preventing and treating certain illnesses."

"It is the responsibility of dieticians to support and strengthen interest in vegetarian diets."

## C CONSUMER PROTECTION

### Recognizing cosmetic ingredients.

For the protection of consumers it is a legal requirement that the ingredients in cosmetic products are identified on the packaging (INCI Declaration). But not much is known about what is hidden behind these (often Latin) terms. For this reason we have put together for you a list of frequently used chemical preservatives, perfumes and petroleum-based products/mineral oils.

### Perfume; fragrance.

Chemical preservatives: Benzoic Acid, Methylparaben, Ethylparaben, Butylparaben, Propylparaben, Triclosan, Imidazolidinyl Urea, Diazolidinyl Urea, Chlorhexidin, Methylisothiazolinon, Sodium Benzoate, Potassium Sorbate, Dibromodicyanobutan, Sorbic Acid, DMDM Hydantoin, Polyaminopropyl Biguanide, Phenoxyethanol, Chlormethylisothiazolinon, Bronopol, Quaternium 115, Isodopropiylbutylcarbamat. Please note: "nature-related" preservatives are chemical preservatives.

Petroleum-based products/Mineral oils: Mineral Oil, Petroleum (Vaseline), Paraffinum-Liquidum, Paraffinum-Subliquidum, Cera Microcrystallina, Microcrystalline Wax, Ozokerit, Ceresin.

If you would like further information about the advantages and disadvantages of individual cosmetic ingredients we recommend the following literature: in particular the "Blue List" handed out for specialists classifies cosmetic ingredients according to the "potential allergic threat" they pose. The "Blue List" is written by the following authors: Dr. H.P. Fiedler, Wiesbaden; Prof. Dr. H. Jopen, Göttingen; Prof. Dr. F.H. Kemper, Münster; Prof. Dr. Dr. N.-P. Lüpke, Osnabrück; Prof. Dr. K.H. Schulz, Hamburg; Dr. W. Umbach, Düsseldorf.

An informative reference book for specialists and consumers without specialized knowledge is also the book "Die Bewertung kosmetischer Inhaltsstoffe anhand der INCI-Bezeichnungen" (A review of cosmetic ingredients based on INCI identification) mentioned by Dr. Ernst W. Henrich und Dr. Thomas Baumann. It serves to evaluate cosmetic products with regards to compatibility, allergic hazardousness and effectiveness. Furthermore a distinction is made between plant and animal ingredients to enable animal-friendly consumers and vegetarians to make the right product choices.

We guarantee you that in our products there are no chemical preservatives, no perfumes and no mineral oils and/or paraffin from petroleum.

## BATH OILS

**These high-quality products contain valuable nourishing oils and active substances and are described individually below.**  
**Note: Add the desired amount of bath oil to the bath water, preferably when the water is running. This promotes mixing and ensures that the bath oils provide the best possible nourishment to the skin. How long you spend in the bath is based on skin type and individual preference. Regular use leaves your skin nourished, soft and silky and therefore more beautiful.**

### Lavender Bath Oil

This valuable bath oil with lavender also contains nourishing active ingredients such as olive oil, apricot kernel oil, jojoba oil, lecithin and vitamin E.

### Lemon Bath Oil

Citronella oil, jasmine oil and frankincense pamper and refresh your skin. In addition, olive oil, apricot kernel oil, jojoba oil, lecithin and vitamin E have a wonderfully nourishing effect.

### BODY TONIC

This wonderful bath oil exfoliator has a base of olive oil and sea salt for face and body. A particularly gentle and refreshing exfoliation is achieved through natural minerals without encumbering ingredients. Application time depends on individual skin type and preference. Cleansing, smoothing and revitalizing, the skin appears fresher, smoother and more attractive. A pleasant bath with one of the DR. BAUMANN bath oils followed by sea salt oil exfoliation is the ideal preparation for the application of other DR. BAUMANN COSMETIC SPA products.

A range of aromatic tonics with various essential oils which are wonderfully refreshing for both face and body. Whether after showering before applying body lotion or simply for refreshment this is always a real treat for skin, body and soul.

### Orange Body Tonic

With natural orange oil

### Mint Body Tonic

With natural peppermint oil

### Rose Body Tonic

With natural rose oil

## BODY LOTION

The SPA Body Lotions are rich but light emulsions with a base of vitamins and natural oils such as apricot kernel oil, macadamia nut oil, jojoba oil and vitamin E. They are free from perfume but each Body Lotion has the effect of specific

aromatherapy oils. Like all DR. BAUMANN COSMETIC products they are free of chemical preservatives, contain valuable natural substances but no mineral oils or animal products. There are four Body Lotions to choose from, each with specific aromatherapy oils:

#### Citrus-Vanilla Body Lotion

Body Lotion citronella, vanilla

#### Jasmine Body Lotion

Body Lotion with  
jasmine oil

#### Orange Body Lotion

Body Lotion with  
orange oil

#### Rose Body Lotion

Body Lotion with  
rose oil

## BODY OILS

All the body oils are on a base of apricot kernel oil. Each body oil has its own essential oil with a specific effect on the skin, body and soul. They nourish, calm, revitalize and/or refresh the skin. The body oils are also ideal for massage. The skin appears healthy, glowing, smoother and firmer.

#### Citrus-Vanilla Body Oil

Body oil with lemon and vanilla in apricot kernel oil

#### Jasmine Body Oil

Body oil with jasmine oil in apricot kernel oil

#### Rose Body Oil

Body oil with rose oil in apricot kernel oil  
Hand care a rich, no oily lotion ideally suited to all skin types, also for problem hands, especially for raw flaky skins.

#### Orange Body Oil

Body oil with orange oil in apricot kernel oil

#### Jasmine Body Oil

Body oil with rose oil in apricot kernel oil

#### Rose Body Oil

Body oil with rose oil in apricot kernel oil  
Hand care a rich, no oily lotion ideally suited to all skin types, also for problem hands, especially for raw flaky skins.

## ESSENTIAL CARE

The term "essential" shows that all essential active ingredients together with a hint of essential oil can put beauty care products in a class of their own. The Essential Care facial products are wonderfully smooth creams, free of perfume but with the pleasantly refreshing effect of citronella oil and vanilla. Like all DR. BAUMANN COSMETIC products they are free from chemical preservatives and contain valuable natural ingredients and oils, but do not contain mineral oils or animal substances. There are three different Essential Care creams to choose from, one for each skin type:

#### Essential Care for oily Skin

Essential Care for dry Skin  
Essential Care for normal Skin

#### Jasmine Body Oil

Body oil with jasmine oil in apricot kernel oil

#### Rose Body Oil

Body oil with rose oil in apricot kernel oil  
Hand care a rich, no oily lotion ideally suited to all skin types, also for problem hands, especially for raw flaky skins.

#### Orange Body Oil

Body oil with orange oil in apricot kernel oil

#### Jasmine Body Oil

Body oil with rose oil in apricot kernel oil

#### Rose Body Oil

Body oil with rose oil in apricot kernel oil  
Hand care a rich, no oily lotion ideally suited to all skin types, also for problem hands, especially for raw flaky skins.

## ESSENTIAL CARE

The term "essential" shows that all essential active ingredients together with a hint of essential oil can put beauty care products in a class of their own. The Essential Care facial products are wonderfully smooth creams, free of perfume but with the pleasantly refreshing effect of citronella oil and vanilla. Like all DR. BAUMANN COSMETIC products they are free from chemical preservatives and contain valuable natural ingredients and oils, but do not contain mineral oils or animal substances. There are three different Essential Care creams to choose from, one for each skin type:

#### Essential Care for oily Skin

Essential Care for dry Skin  
Essential Care for normal Skin
